All about summer

Summer is one of the four seasons; it is the season that comes after spring. Summer begins in June and finishes in August.

What happens to the animals?

Many birds visit England during the summer, like ospreys. Ospreys are good at fishing and they jump into water feet first.

Beautiful butterflies can be seen flitting around gardens in the sunshine. If you visit the beach or go out to sea in the summer, you might be able to spot seals or basking sharks.

What foods are in season in summer?

During the summer lots of fruit and vegetables are available easily. So many are in season in the summer, for example strawberries, peaches, apricots, runner beans and tomatoes.

What is celebrated in summer?

Schools and universities usually have a summer holiday which is the longest break from school. It is usually around 6 weeks long.

It is often the season where we have the hottest weather. Many people enjoy spending more time outside during the summer. You might choose to take part in some fun activities and do things like visit the beach, have a picnic or barbecue and play cricket, golf or tennis.
