

T Level Engineering Academy

Hepco's national award winning T Level Academy provides an excellent pathway for school leavers to begin a career in engineering. The programme combines classroom learning with hands-on experience, including one day per week (minimum of 315 hours across the programme) at Hepco's manufacturing facility in Tiverton.

Your Path to a Career at Hepco

Work Experience

Each summer, we welcome many Year 10 students to the business as part of our work experience programme. This offers an insight into engineering, giving students first-hand experience of a career in engineering.

T Level

Whether you have previously completed work experience with us or are joining us for the first time, a T Level offers valuable industry experience alongside studying for a recognised qualification at college.

Apprenticeship

On completion of your T Level, there's an opportunity to be invited back to Hepco to complete an apprenticeship. This next step is more career-focussed, giving you the opportunity to earn while you learn.

Career

Successful apprentices may be offered the opportunity to build a long-term career at Hepco. With strong progression opportunities across the business, some former apprentices have even progressed to Director level.
